## CATALOGUE

Dear Customer,

We thank you for purchasing our catalogue and trust you will find amongst these pages the figures of your chosen period in history as well as noting from the photo section the consistent high quality of our products throughout.

Those of you making purchase by mail order at least have a visual check of the majority of products shown in this now much enlarged photo section (a very much requested idea from many of you) though we are of course unable to photograph every item or the thing becomes the cost of an encyclopaedia rather than a simple catalogue!

To the newcomer to our hobby we would point out that the 15mm figure ranges are without doubt the scale to go for, both in their manageable size on the games table, and what you obviously like also is their cost to you – you simply get more troops for your money! These facts coupled with the growing realization that a 15mm is no harder to paint than it's larger 25mm predecessor guides the way for us all and therefore our new additions are to the 15mm ranges only.

We would like to thank all those of you who have sent in requests, ideas and detailed information with regards to future figure additions for the next two year design programme, much of your wishes are to be found in this new catalogue.

We would also point out that this catalogue contains lists for future figures and ranges which are to be made, and you should consult the separate information sheets for a guide to their date availability.

Happy gaming!

- T.Y.W. 42 Artilleryman Firing Gun

Many of the figures in our ECW range could also be utilised for this period. The Swedish Army at one time fielded 3,000 bowmen and always had a large contingent of Scottish Infantry. The Imperialist Army might sometimes include figures from our Renaissance series also, such as the Polish Winged Hussar.
